

CTF Write-up — Arctic Artifact Recovery

Category: Forensics

Points: 100

Author: p3f0rm3r ({x0x} Team)

Description

The challenge asks for an open-source tool used to recover deleted files by carving data based on file headers and footers.

Solution

I searched for file carving tools used in Linux forensics and found that the correct tool is foremost.

Example usage:

```
foremost -i disk.img -o output/
```

Flag

atcctf_foremost

Conclusion

This challenge tests knowledge of file carving tools used in digital forensics.
